

Our quick & easy electricity connection service will save you time and money.

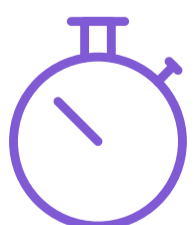

And it's FREE in de-regulated areas (90% of TX sites)

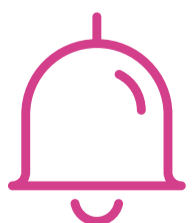

Request a new meter in 60s then relax as we handle all the tedious followup work

One simple web portal works across all Texas utilities, on any device, with one simple process

No more wasting hours on hold because we'll fix any issues with the Utility or Retailer.

Your whole team stays in the loop with live status updates and full access to a shared dashboard

Expert Texas-based support via phone, text, email and online chat

\$125 /home fee applies in regulated areas due to lack of Retailer subsidies.

Connecting power to your sites is a real pain in the butt !

-  **First, identify which utility to contact** for the address
-  **Request ESI-ID** from the correct utility portal
-  **No immediate response** so call utility to enquire
-  **Request temporary meter** via retailer portal
-  **Call retailer** to check on temporary meter progress
-  **Fix any site access issues** then call retailer again
-  **Call city to obtain missing permit** causing a delay
-  **Email permit** once you figure out where to send it
-  **Call retailer again** to confirm meter is energized
-  **Later, request permanent meter** via retailer portal
-  **Wait on hold again** chasing meter progress updates
-  **Call home owner** to transfer account before closing

That's a lot of time and effort to repeat for every single site.

But with UtilityOn, there's just 1 easy step:

Request online in 60 seconds.

Enter the address and basic meter info then we handle everything else.

For FREE across all de-regulated areas of Texas.

We organize the ESI-ID

and follow-up the utility if necessary.

We co-ordinate the meter install

plus chase any delays, including waiting on hold.

We send regular updates

to your whole team so everyone stays in the loop.

We help resolve any issues quickly

because our team have fixed them all before :-)

We help transfer the account

to the home owner before closing.

Plus you can track and manage every meter via our **simple online dashboard.**

Then track and manage all your meters in the one place.

Upload & share related documents

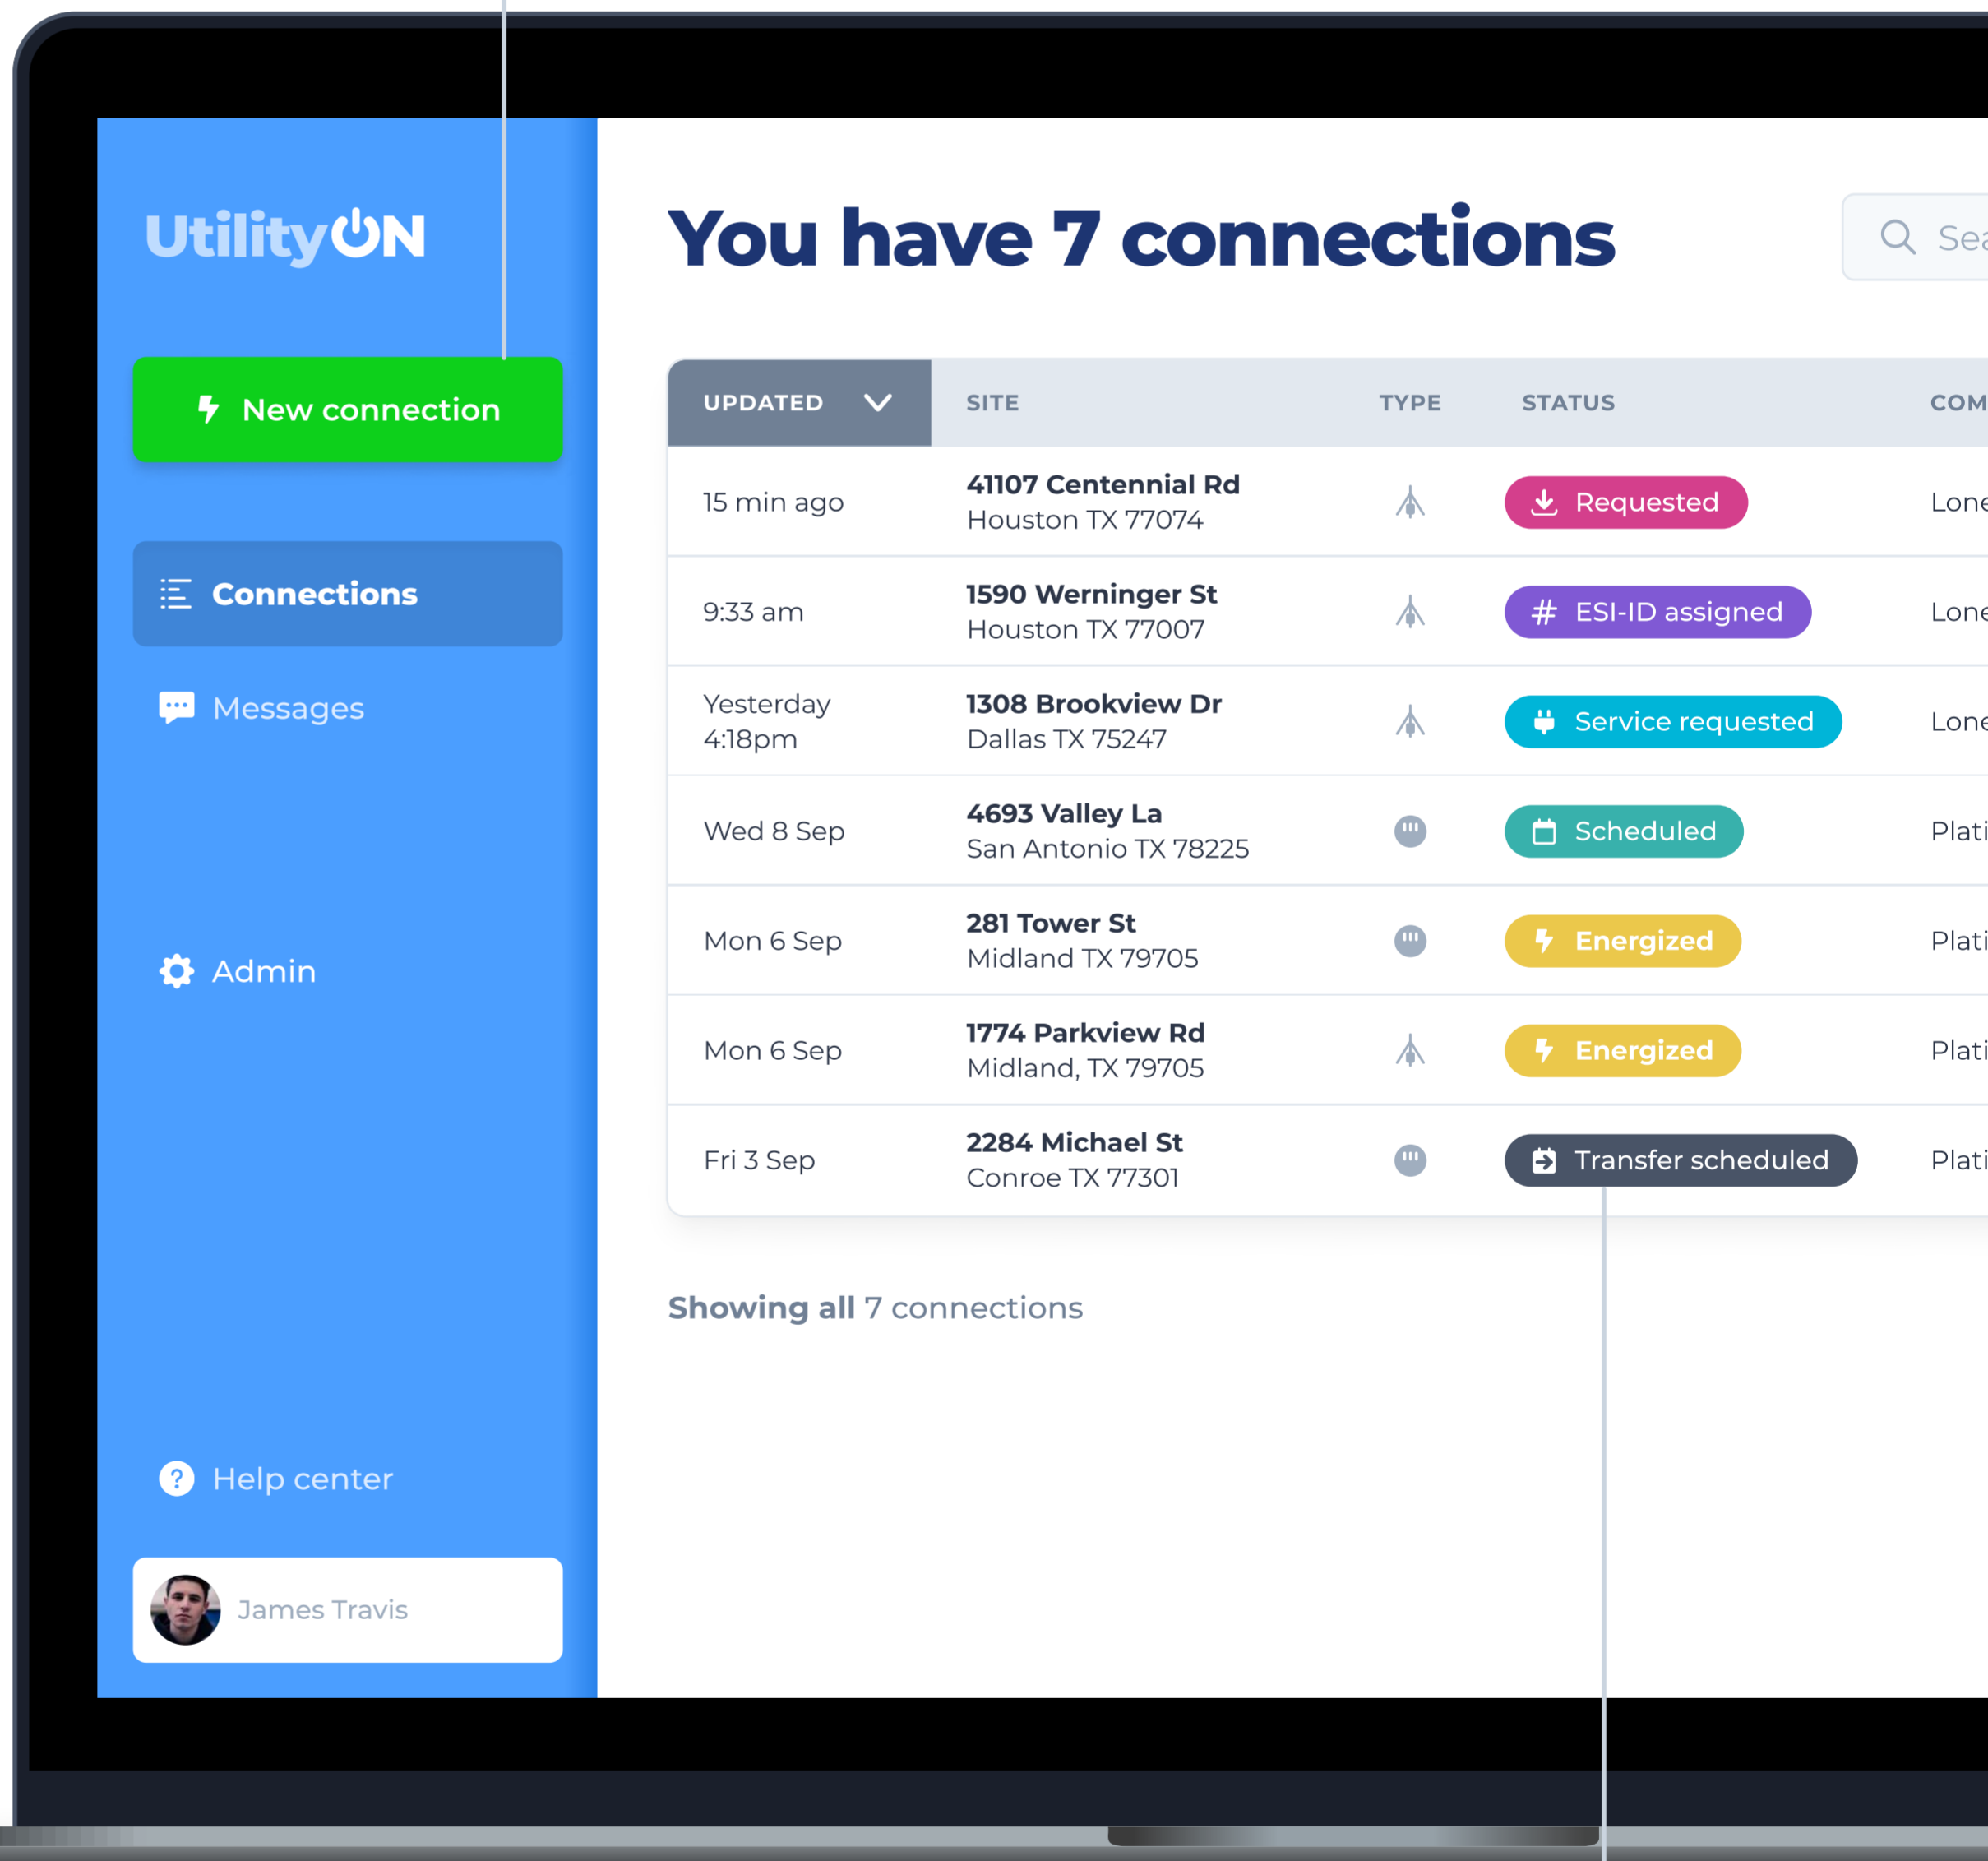

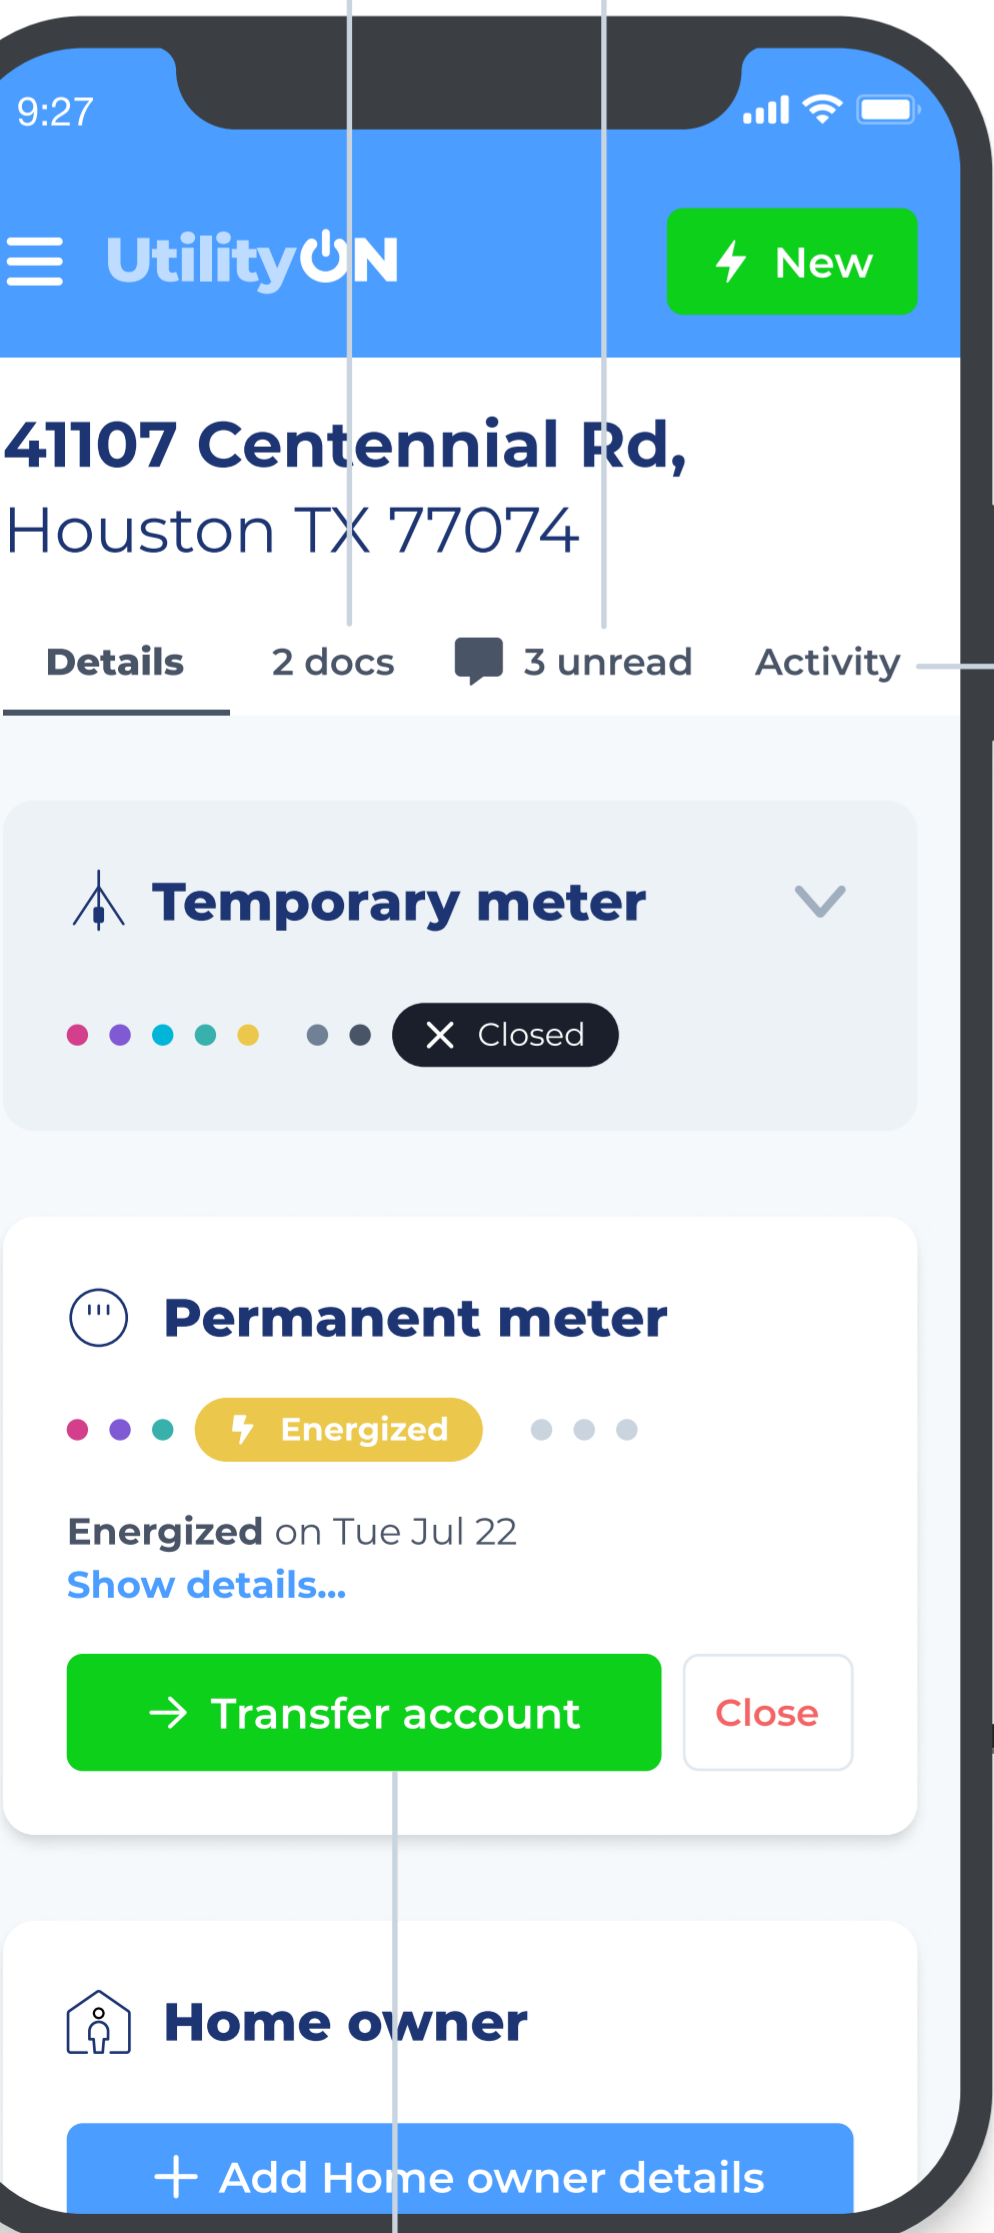

Keep everything together, not scattered across multiple folders & email attachments.

In-app messaging

Chat live online with our expert Texas-based support team, or call, SMS or email if you prefer.

New connection button

Request a meter from any TX utility (including regulated areas).

Activity log

Full visibility of what happened, when, and why.

Status tags

Track the progress of all your sites at a glance.

Transfer accounts in 1 click

Just enter contact details for the home owner before closing.

Here's what other TX builders think of our service ...

“ Y'all are crazy if you don't try UtilityOn.

It costs nothing and we get power on faster than ever while UtilityOn handles any problems. ”

Tina M. Ellis

RM Quality Construction
Conroe TX

“ Now I can update my Project Managers without spending unnecessary time on the phone with the electricity providers.

We are so thankful for the awesome service you provide! ”

Angie Gunn

Morningstar Builders
Houston TX

“ Before UtilityOn, we constantly had problems connecting and transferring the power. Now Jeremy and the UtilityOn team chase up everything for us.

We save heaps of time and it's free which is awesome ”

Stephen Ramos

Gracepoint Homes
Magnolia TX

Just a few of our clients...

For privacy reasons, we can't list all the Texas home builders who use UtilityOn, but here is a small sample:

ASPEN GREY®
HOMES

EDEN
EQUITIES

Finally - how can UtilityOn possibly be free?

Because in de-regulated areas, Retailers cover our costs, not you.

Any Utility or Retailer charges are still your responsibility, but our service is free across approximately 90% of Texas building sites.
